Applying the Black Cancer Poultice

Remember the Cancer Poultice is only a part of the Incurables Program.

The entire program must be followed to effect a true healing in the body.

Skin Cancer

- Apply as thick paste over affected area twice daily.
- Hold in place with bandage.
- Poultice will often dry to a hard crust. This can be soaked off when taking a shower or bath.

It is a good idea to do the entire incurables program, which includes the liver flush, once or twice during this process.

The Liver must be free to remove the disease from the body for a true healing to take place.

Tumors

- Smear generous amount onto flannel material.
- Apply over tumor and bandage in place.
- Leave on overnight or for 6 to 8 hours.
- It is best to alternate Cancer Poultice with Caster oil pack.

To clear the underlying condition it will be important to do the incurables program including the Liver Flushing routines while healing the body.

Note: While clearing breast tumors it is not uncommon for bleeding to occur from time to time as the tumor breaks off. This can be stopped quickly by packing the area with Cayenne powder or flushing with liquid Cayenne extract.
