Epilepsy is a disorder marked by disturbed electrical rhythms in the centra nervous system.

## Juices for Epilepsy:

Turnip leaf, watercress, spinach.

## Testimonials

### Dr. Christopher's Antispasmodic Tincture:

I just received your newsletter, and in reading the information on epilepsy I found that you didn't mention your antispasmodic tincture.

I have epilepsy and have followed your program with the B & B tincture and oil of garlic and I'm sure this is effective over a period of time; but the antispasmodic tincture will stop the seizure in the process. I have used it successfully--even during home childbirth. This is a very good test, as epileptics could tell you, as childbirth always causes seizures.

#### Antispasmodic Tincture

½ oz Bottle \$15

1 oz Bottle \$25

#### Dosage:

1 to several Drops.

I have also given the tincture to a friend for her baby. They had just spent almost \$1,000 on tests and medication the "AMA Way" and were having no success in stopping the seizures. They say this tincture has changed their lives. Having experienced epileptic seizures, I know that is no exaggeration.

I have never read or heard of this tincture being used for epilepsy, but was led by the Spirit to use it. I hope this might be of help to others who are suffering. God bless you.

## The Answer Comes after Prayer & Meditation

**Dr. Christopher's B&B Tincture:** A boy 12 years old was brought to me as a patient several years ago, who was having severe epileptic seizures and these had started after the child had received head injuries in an automobile accident. I have had success treating epileptic patients up to this time, by using our basics; bowel cleaning and blood purification, as well as using antispasmodic herbs. However, none of the procedures I had used over the years so successfully, worked at all with this new 12 year old patient.

Blue Vervain

Blue Cohosh

One night I sat alone in my office, after all my patients had left for the day, wondering why I was not getting the results with this boy as I had with others with the same condition. I realized that I needed "help" and so I prayed earnestly that something could be done for this child and after some time of praying and meditating an "idea" for a "formula" of herbs for nerves came to my mind. I quickly wrote down: **Blue Cohosh, Black Cohosh, Blue Vervain, Scullcap, and Lobelia in a 90 proof tincture.** I immediately went to the lab we had out in back of the office, and made up the tincture. When this formula was given to the epileptic boy patient, there was an immediate reaction, and before long, he showed great improvement.

Black Cohosh

We found this same amazing formula would stop hiccups and was great to use by drops in the ear with oil of garlic to clear up earaches, and has even restored hearing in some cases. We called it **B & B Tincture aka Hearing Loss Formula.**

## Only Alcohol Can Extract the Values from Black Cohosh

**Dr. Shook Cured Epilepsy:** Dr. Shook related a case wherein a young girl was brought to him with a longstanding case of epilepsy. She had suffered various injuries during her attacks. Shook made a strong decoction of Black Cohosh, blue gentian and valerian root, expecting immediate results, but the seizures continued.

Shook then consulted an old herbalist, who informed him that **only alcohol could extract the antispasmodic values from Black Cohosh.**

The parents tried the tincture, given here, and the seizures gradually decreased from up to thirty in one day to nearly none after six months.

Dr. Shook's Formula consists of **Black Cohosh, Blue Cohosh and Blue Vervain.**

## ARNICA

I have found this herb to work almost like magic. When applied shortly after an injury it prevents any bruising or swelling from occurring. As an oil or salve it should be applied over the entire affected area carefully avoiding any open wounds. This herb should NEVER be applied to an open wound.

A local member passed out at Wal-mart falling directly on his face, consequently breaking his nose. Preferring not to be treated at the hospital he called asking for a ride home. When we got back to the office he applied the Arnica oil to his entire face and chin. Over the next few days he experienced no pain or bruising except for a small bruise under his chin where he had failed to apply the oil.—Dara Dietz

**Arnica is an important herb used externally; it is rarely if ever used internally.**

- ❖ The tincture is used for bruises, sprains and wounds, if the skin is unbroken.
- ❖ You can dilute the tincture, as too strong or repeated use may cause irritation or inflammation.
- ❖ The much-dilute tincture is used for inflammation of the mouth and throat.
- ❖ You can use the diluted tincture, hot, for sore muscles.

The homeopathic preparation in the 6X size is often used for shock and muscular pain; it is called the "homeopathic painkiller" by Dr. Dorothy Shepard.

**FOR EXTERNAL USE ONLY**, bruises, sprains, injuries and falls, shock, muscular pain, childbirth, bone setting, concussions and fractures.
