# M&C SALVE

## MULLEIN & CAYENNE

### This salve is an Excellent Circulatory Aid

#### Topical Aid For Neurotropy

The Formula for our Mullein & Cayenne Salve was developed by Dr. Christopher as a topical aid for painful neurotropy. The herbal combination in this formula work together to effectively break through any blockage bringing oxygen & nutrient rich blood to the affected areas. Breaking through the blockage aids in stopping the pain. Blockage creates pain in the body. In cases of neurotropy the increased circulation aids in rebuilding the damaged nerve tissue when used along with a nerve restorative formula. It is also suggested in cases of neurotropy that using a good Cayenne extract to aid in overall circulation has been found to be very helpful.

For Best Results massage into the feet or affected area as needed. Use a breathable natural fiber socks, (cotton or wool), to aid the body's circulation in healing the affected area.

#### Topical Aid for Overworked Muscles

This formula when applied topically in salve form, has been found very effective as an aid to quickly reoxygenate exhausted overworked or overused muscles, thus preventing the achy stiffness that often accompanies a vigorous workout. Where the cayenne quickly provides oxygen rich blood to the starved muscle tissue, the mullein works to quickly remove the excess lymph fluid brought into the over used muscles preventing any achy soreness from forming in the area.

For best results massage salve into the affected area directly after the workout.

**Note:** Cayenne will not heat up on the outside of the body when left uncovered or dressed in a natural breathable material.

#### Salve Tins Size & Price

- 2 oz Salve \$19
- 4 oz Salve \$35
- 8 oz Salve \$70
